

Beloved Brethren,

Greetings from your pastor in the name of our gracious King! I pray that this message finds you well in his grace and exalted in his mercy - relying upon Him who is worthy of our loudest praise...

This message is an update on the late epidemic that has hit the congregation of our children. After having it hit our home (we suppose) we were greatly wondering at this "chicken pox" because it wasn't manifesting as we thought is typical: Judith had rising, burning bumps *only* on her hand. I didn't even know if it was the them suspected virus or not (nor are we convinced yet that it is a virus at all); nevertheless, it got us thinking. We heard that "Hand, Foot, and Mouth Disease" was often misdiagnosed for Chicken Pox and so we searched it out more and found many of the symptoms in line with what we have been experiencing. In light of this new information, brother Jesse made inquiry with the brethren whose families have been affected... It seems this very well is what is passing so suddenly between our children, though it is not certain beyond a shadow of a doubt.

Below is what Jesse has gathered on this virus (which is more mild than Chicken Pox), and also his meditations on how the Lord is responding to us, fearfully, in regards to Sean's burden for the children which manifested that night of the prayer meeting a couple of weeks ago and was followed the next day in the teaching upon their *original sin*. Please read all for your further information and edification.

O may God have mercy and visit our unconverted, God hating, sin loving children!

In Jesus' name,  
Yours Till Death,  
Brother Jake
